CONFIGURATION GUIDES › ADMINISTRATION & SECURITY

Configure SMTP for Gmail

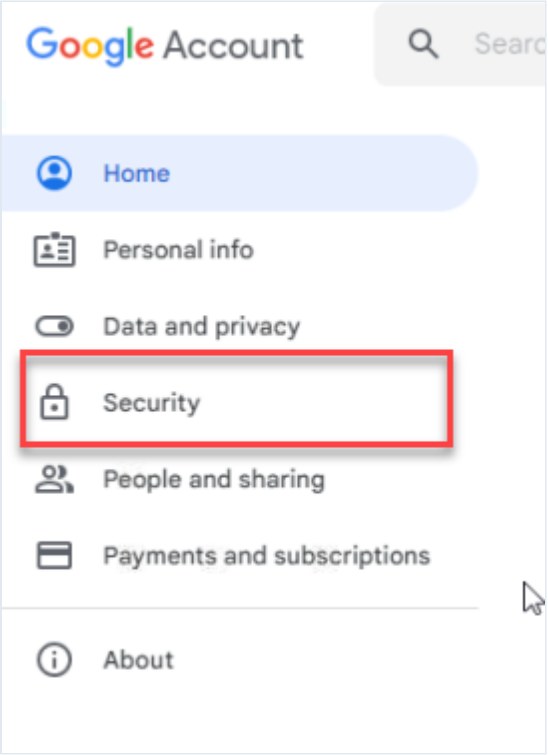

Applicare 10.0 · Updated September 13, 2024 · alerts · **Pending technical review**

Step 1: Log in to your **Gmail** account.

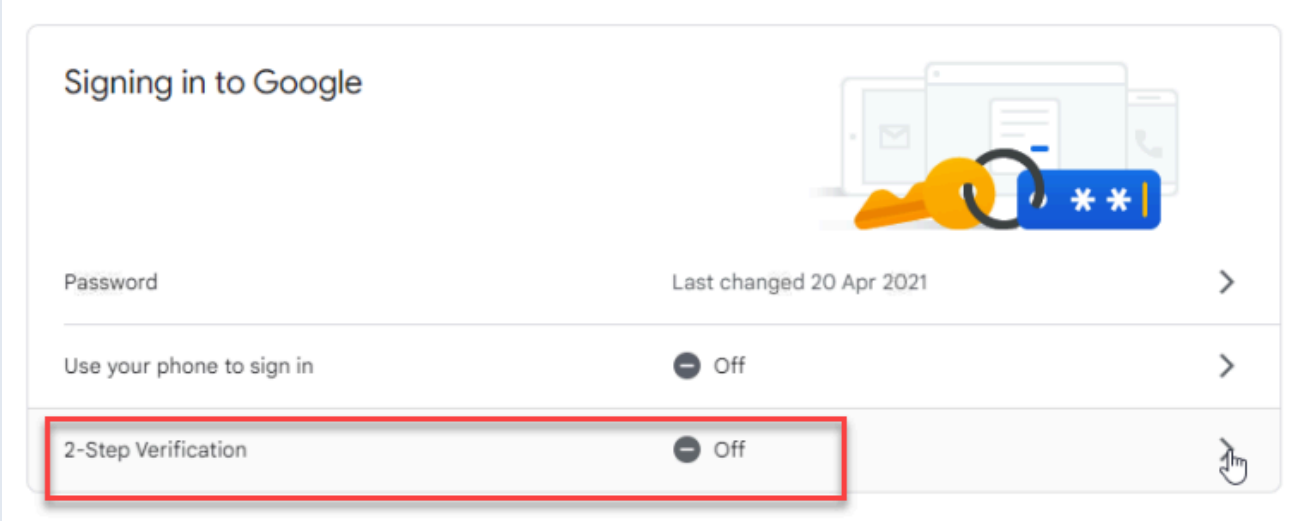

Step 2: Click on your Google account icon and select **Manage your Google Account**.

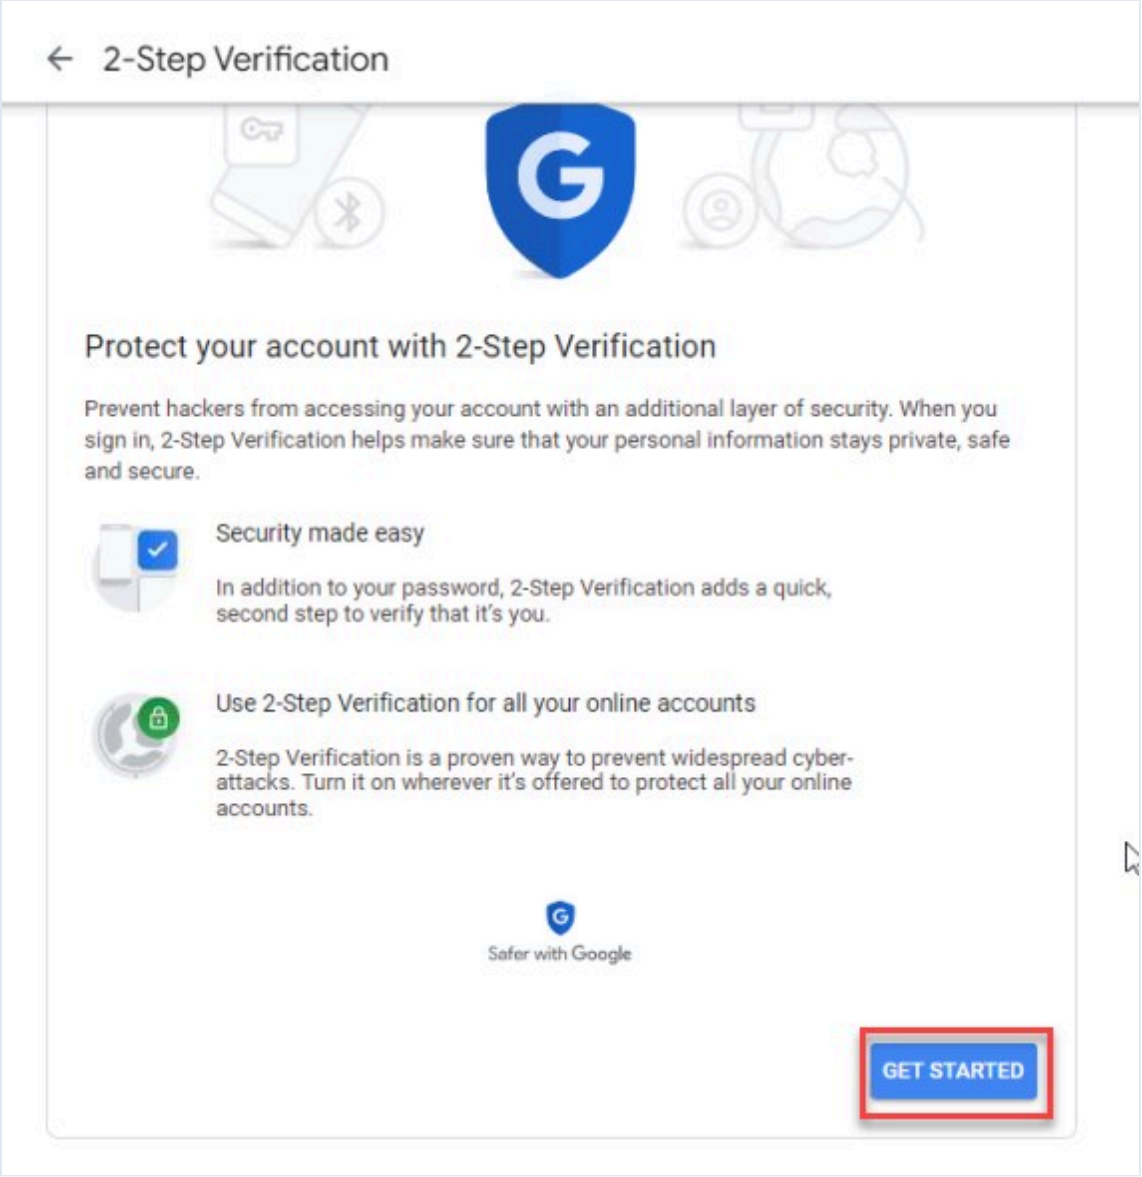

Step 3: Click on the **Security** option on the left side.

Step 4: Click on **2-Step Verification.**

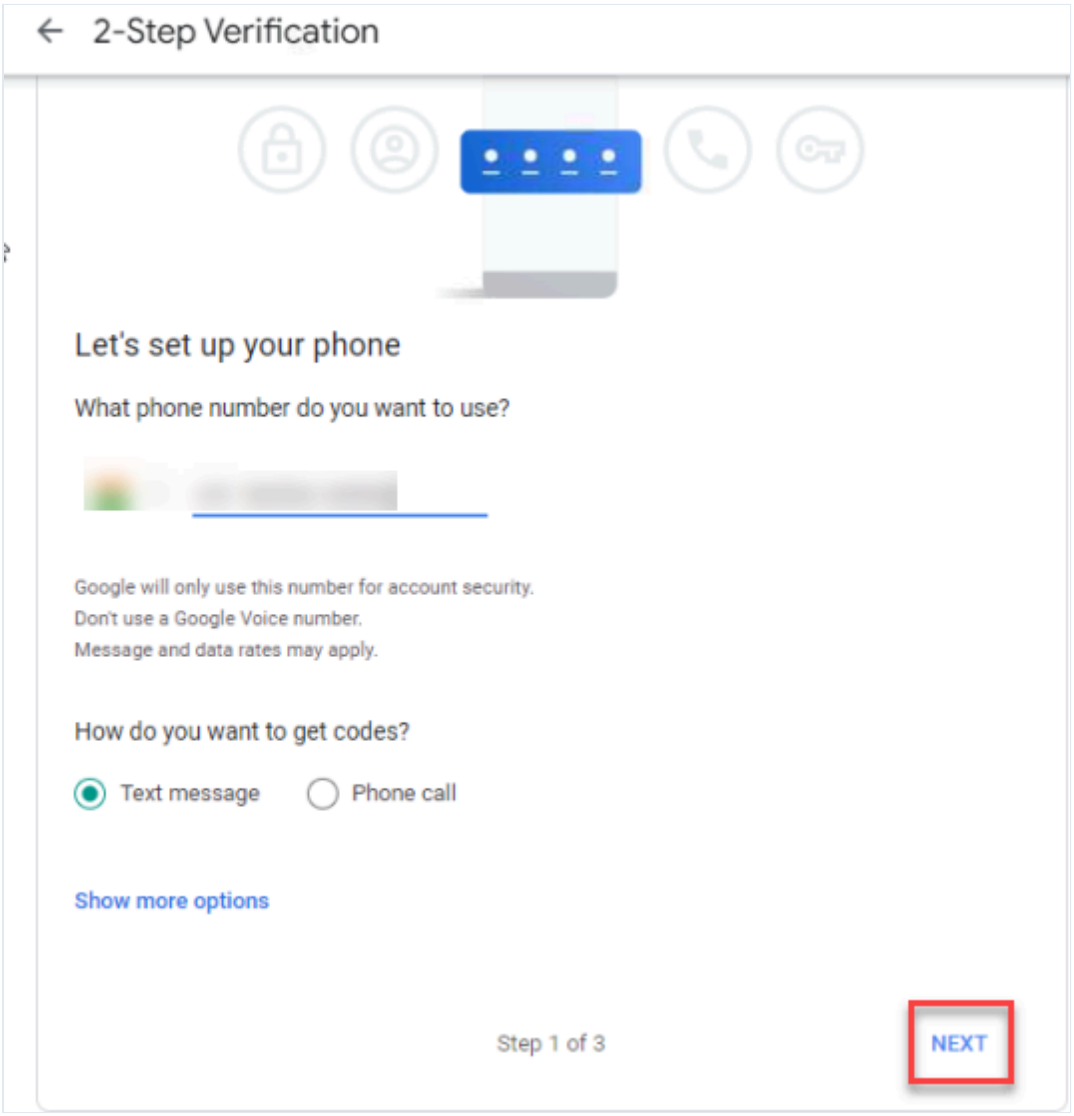

Click the **"Get Started"** button.

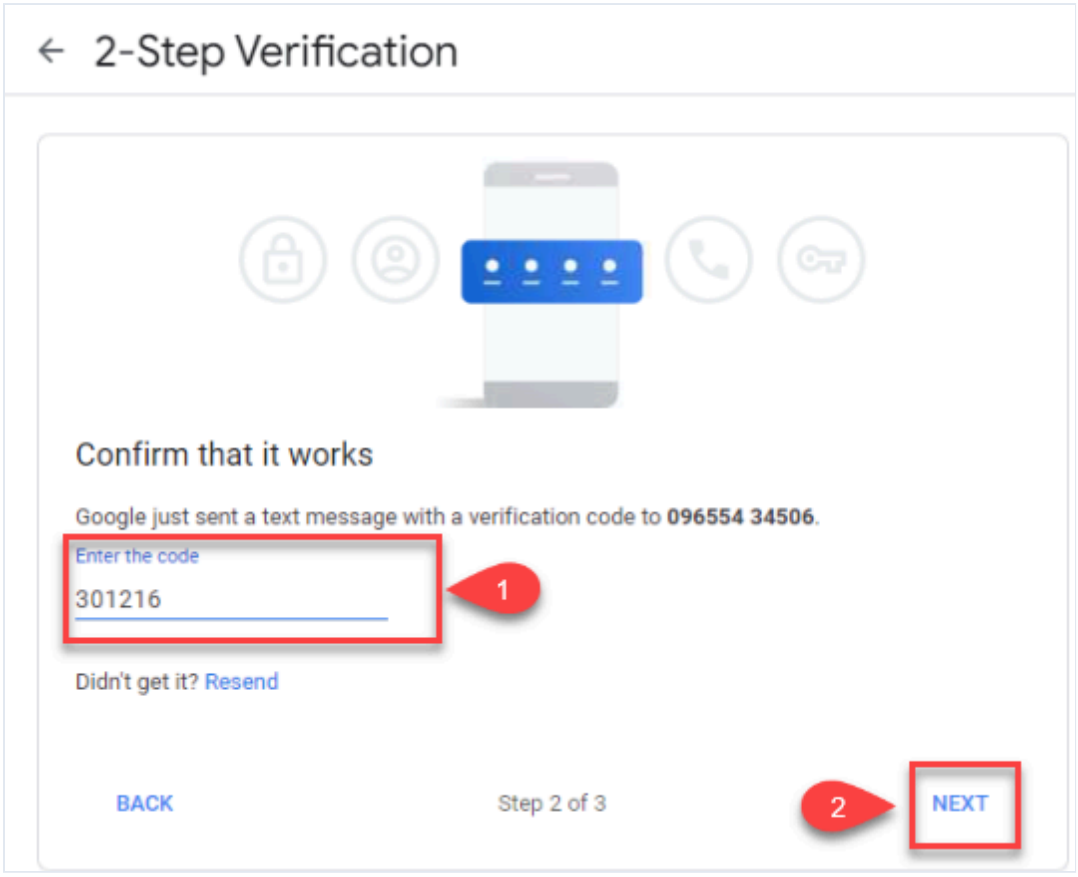

Step 5: Log in again using your **Gmail password** and **verification code**.

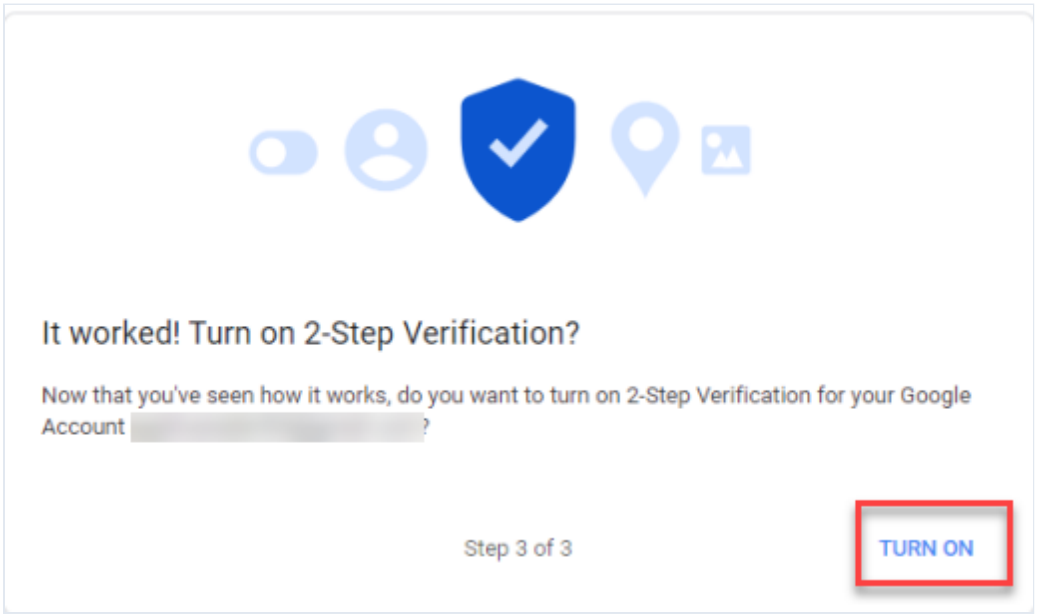

Step 6: Verify your **mobile number** and click on **Next** button.

Step 7: Enter the **verification code** and click on the **Next** button.

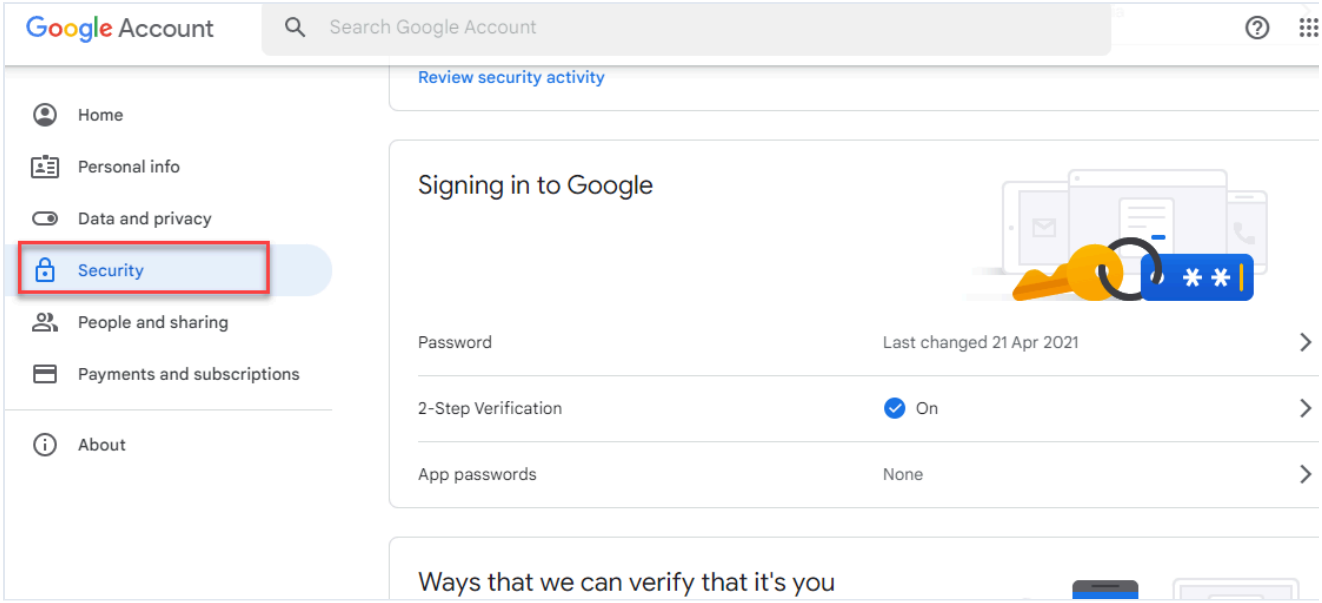

Step 8: Click the **Turn On** button.

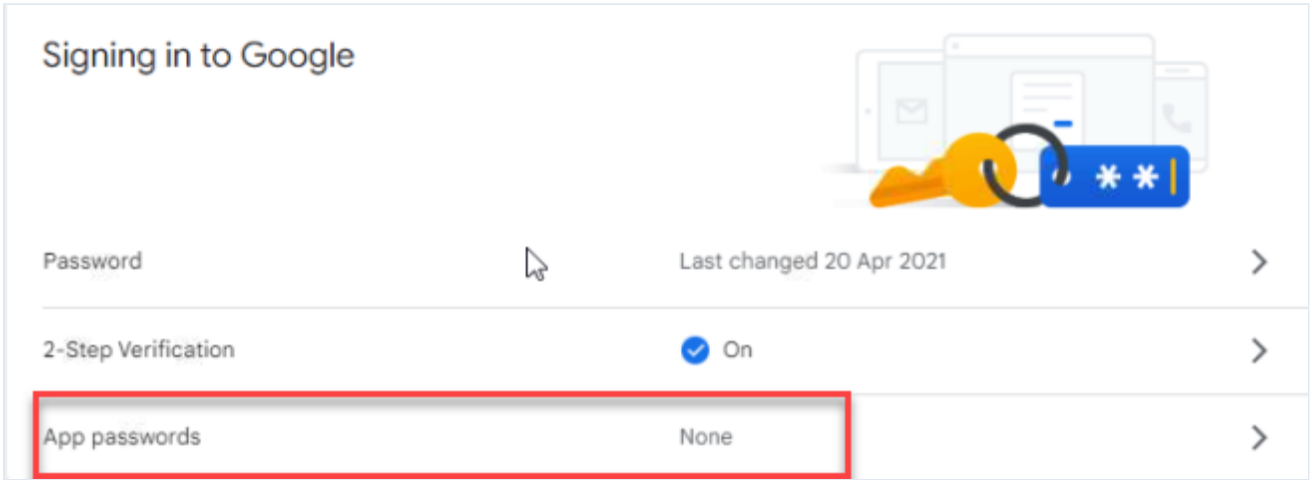

Click on 2-Step Verification to access the Gmail security screen.

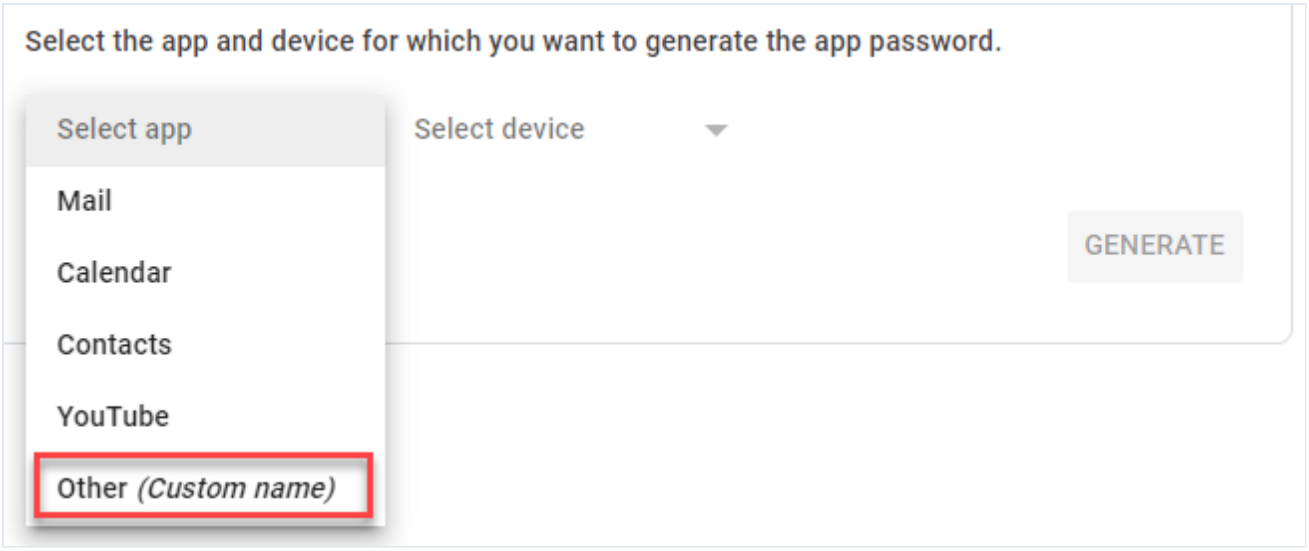

Step 9: Click on **App password**

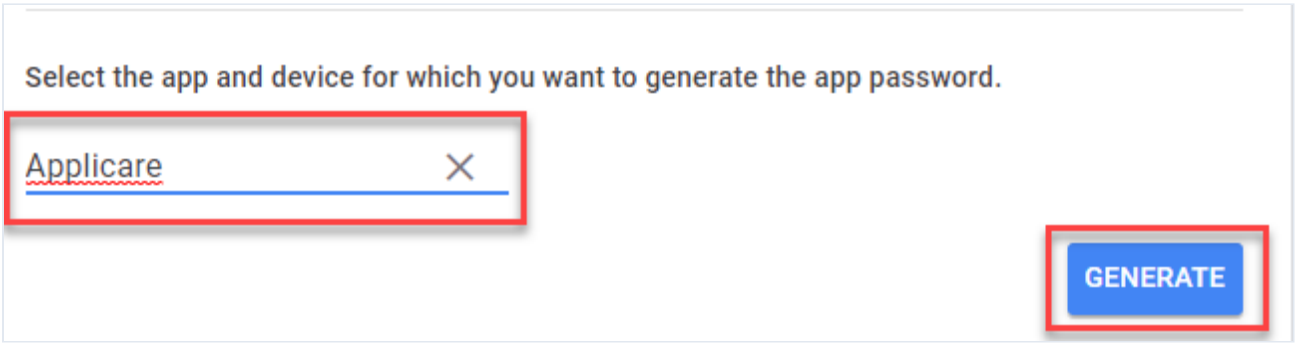

Step 10: Log in again your **Gmail password** and **verification code**.

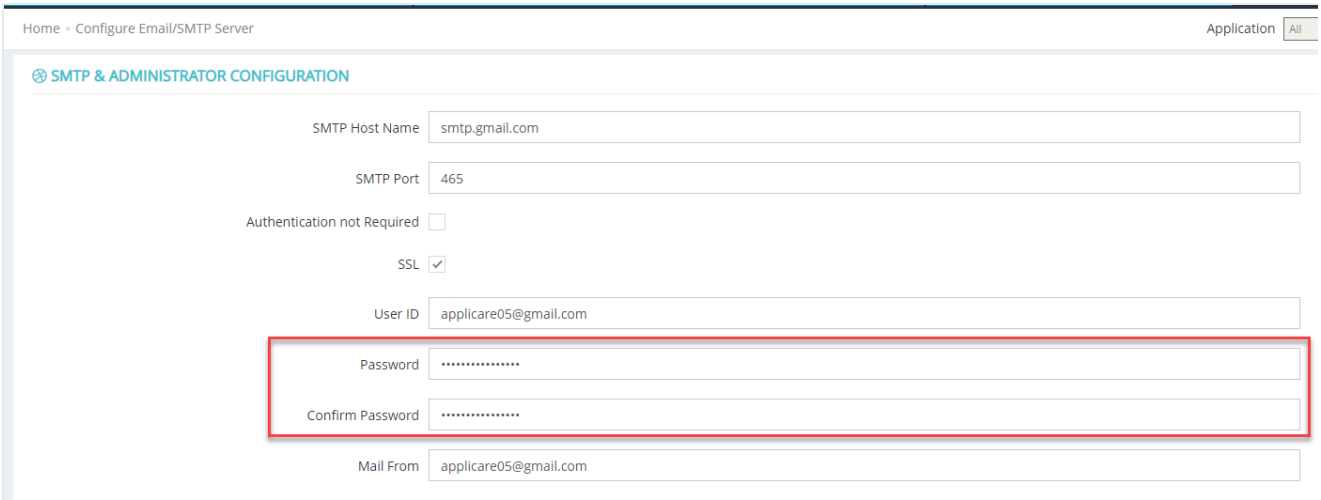

Step 11: From the **Select app** dropdown menu, choose the "other (custom name)" option.

Step 12: Enter "Applicare" name as the **App name** and click the **Generate** button.

Step 13: Copy the generated app password and save it in a file. This app password will be used as the email password in the SMTP configuration.
