CONFIGURATION GUIDES › INSTALL, START & UPDATE

Start the Controller in command-line mode

Applicare 10.0 · Updated September 13, 2024 · controller, windows, tasks · **Pending technical review**

Step 1: Open a command prompt with **administrator privileges.**

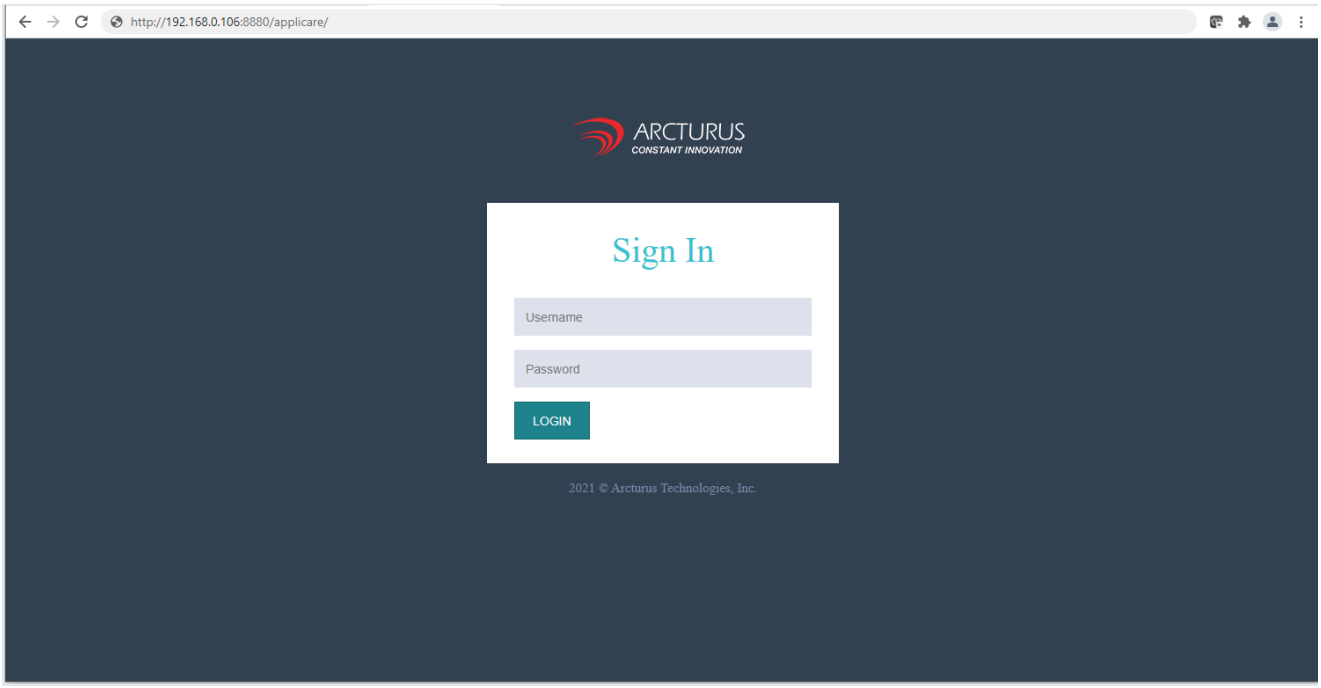

Step 2: Navigate to the directory where the **Applicare controller** is installed, then go to the **/server/bin** path and run **startup.bat** to start the Applicare controller.

Step 3: After the controller is started, you can access the Applicare console in any web browser using the IP address and port specified during installation.

Applicare console URL : **http://<IP>:<PORT>/applicare**

For the above case Applicare console URL would be: `http://192.168.0.106:8880/applicare`

The default username and password for logging into the Applicare dashboard are both "admin".
