CONFIGURATION GUIDES › INSTALL, START & UPDATE

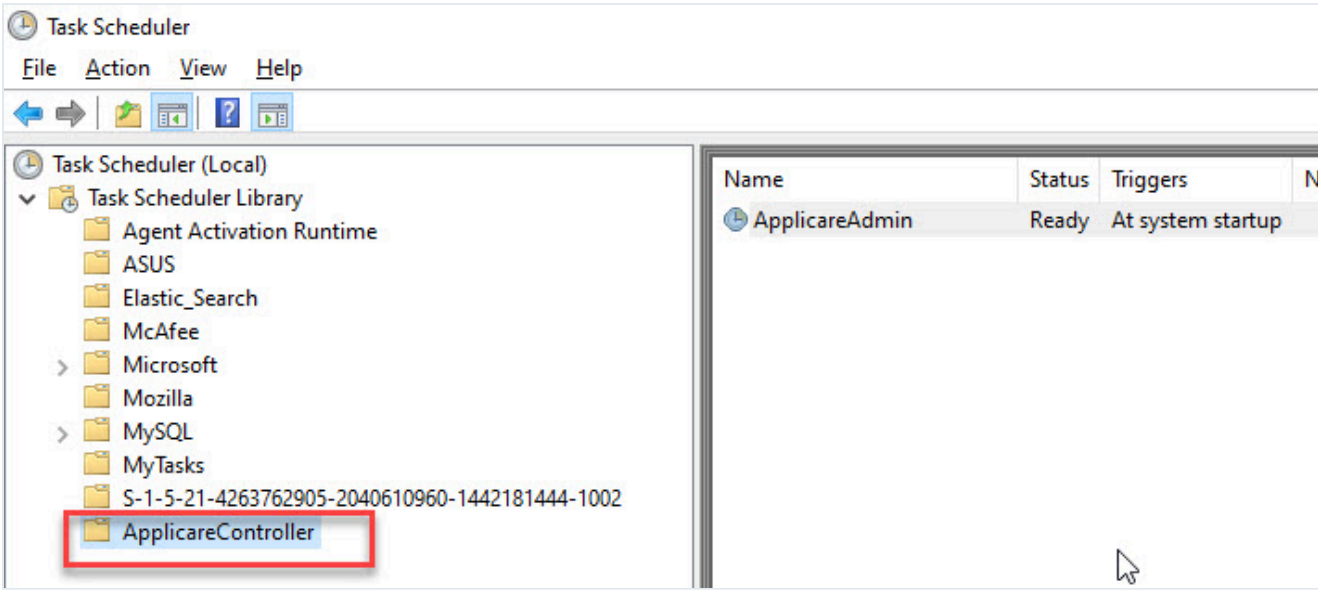

Start the Controller in Task Scheduler

Applicare 10.0 · Updated September 13, 2024 · controller, windows, tasks · **Pending technical review**

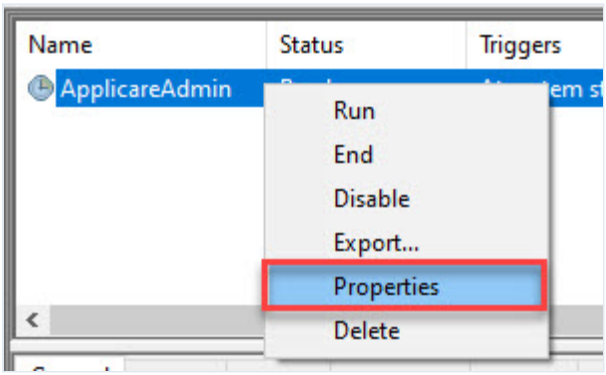

Step 1: Open the command prompt with administrator privileges, and navigate to the **Applicare controller** installation directory, and run the **createControllerTask.bat**. file.

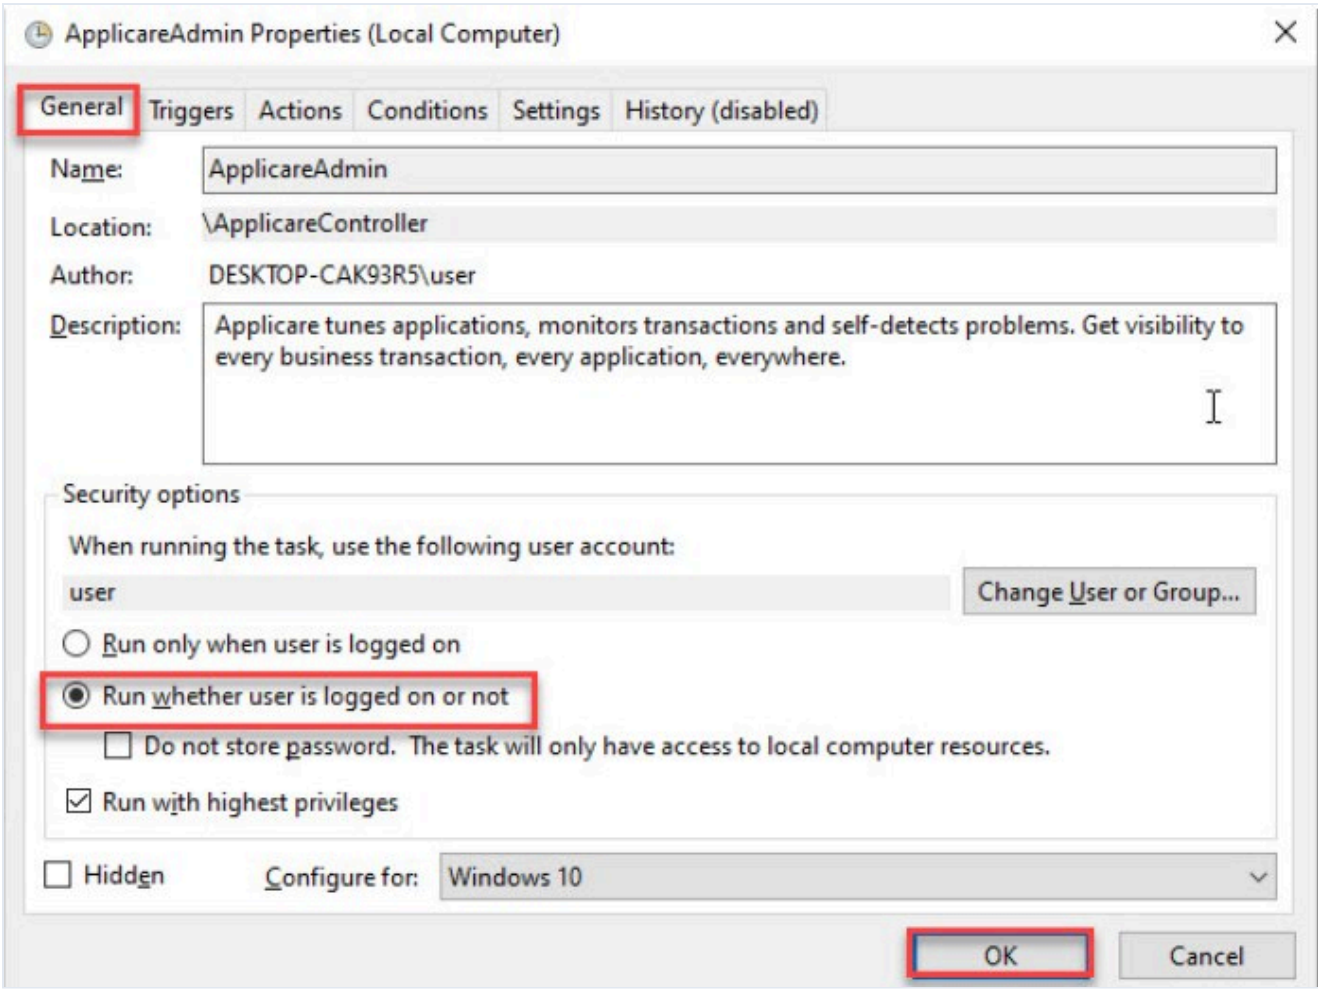

Step 2: Open Task Scheduler, expand the Task Scheduler Library, and select the ApplicareController folder.

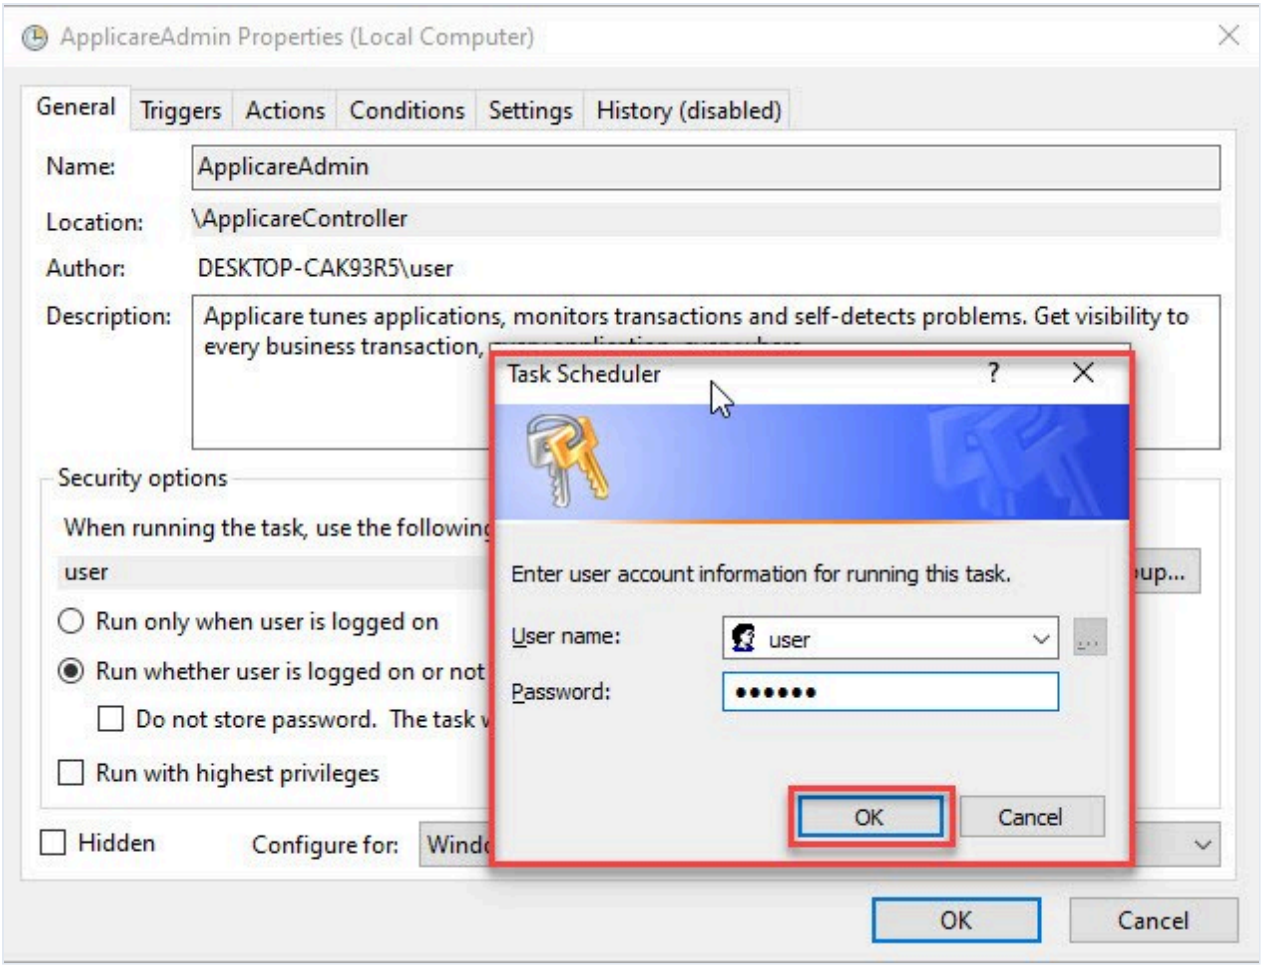

Step 3: Right-click the **ApplicareAdmin** task and choose **Properties**.

Step 4: Select the **Run whether user is logged on or not** option and click **OK**.

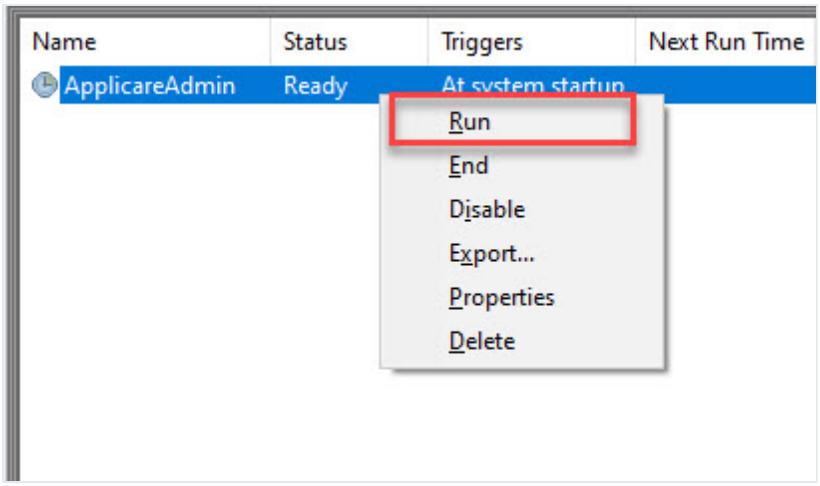

Step 5: Enter the **username** and **password,** then click **OK**.

If the **2147943712** error occurs while saving the password. **Refer here**

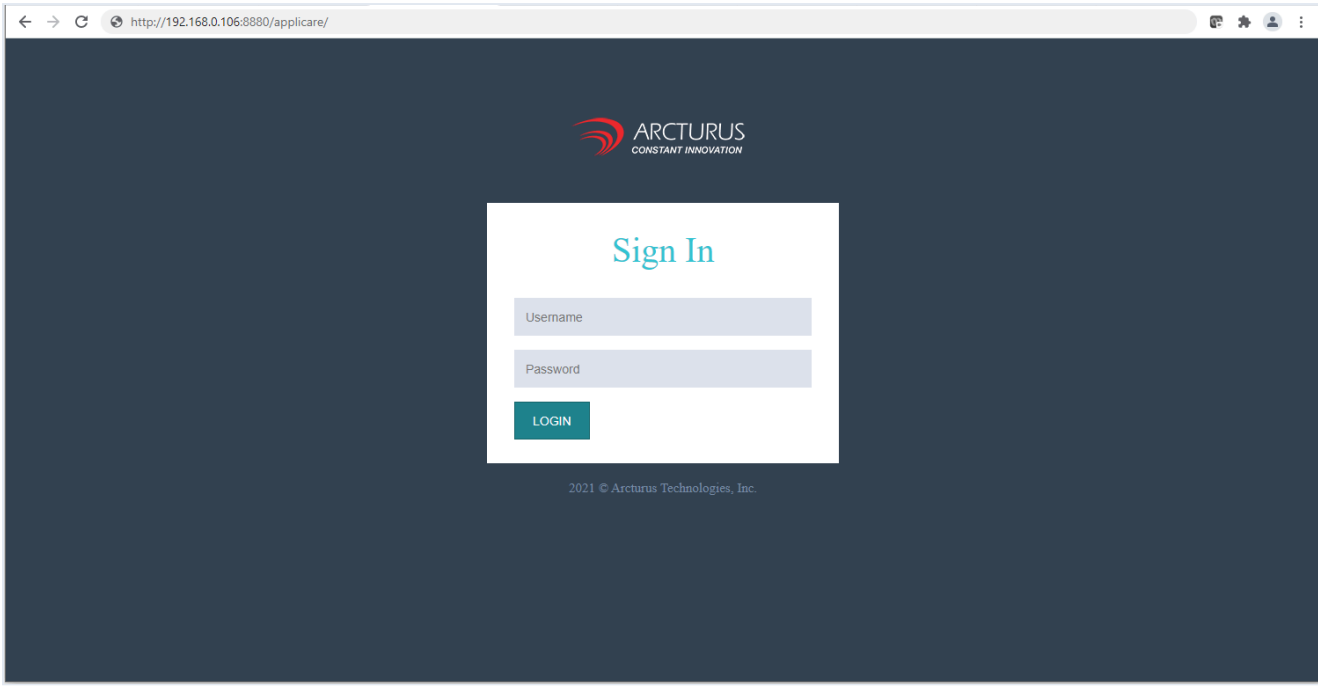

Step 6: Right Click the **ApplicareAdmin** task and select **Run**.

Step 7: After starting the controller, you can access the Applicare console using any browser by entering the IP address and port you specified during the installation.

URL for the Applicare Console : **http://<IP>:<PORT>/applicare**

For the above case Applicare console URL will be: `http://192.168.0.106:8880/applicare`

The default login credentials for the Applicare dashboard are both "admin" for the username and password.
