USING APPLICARE › TRANSACTIONS

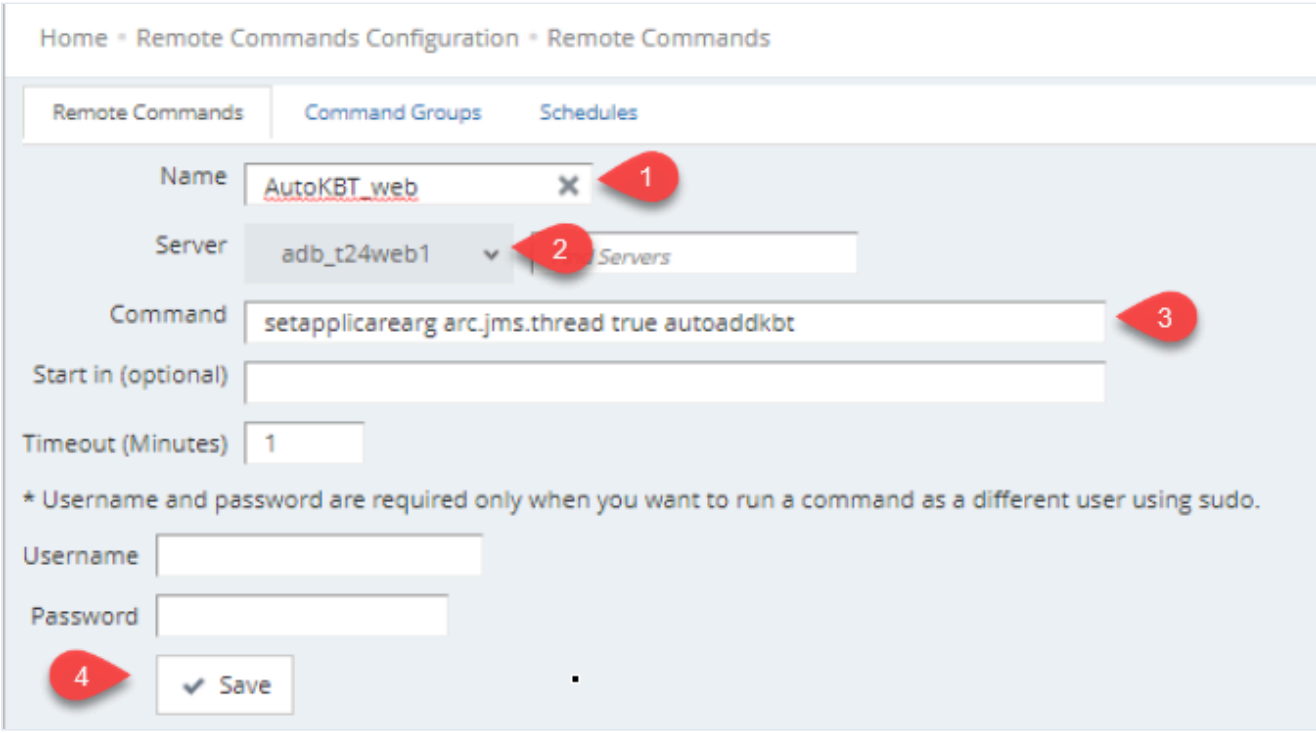

Automatically add KBT configuration

Applicare 10.0 · Updated September 9, 2024 · **Pending technical review**

Step 1: Log in to Applicare console, navigate to the **Remote Commands** screen, and then click the **setting** button.

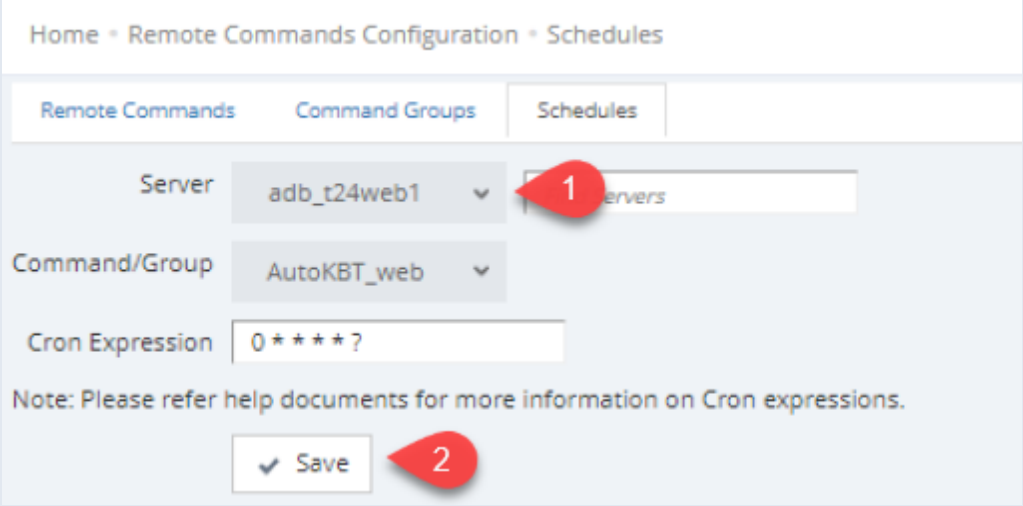

Step 2: Enter a name in the **Name** field, select a server with either **sender or receiver** application from the **Server dropdown**, paste the command into the **command field** and then click **save** button.

```text
setapplicarearg arc.jms.thread true autoaddkbt
```

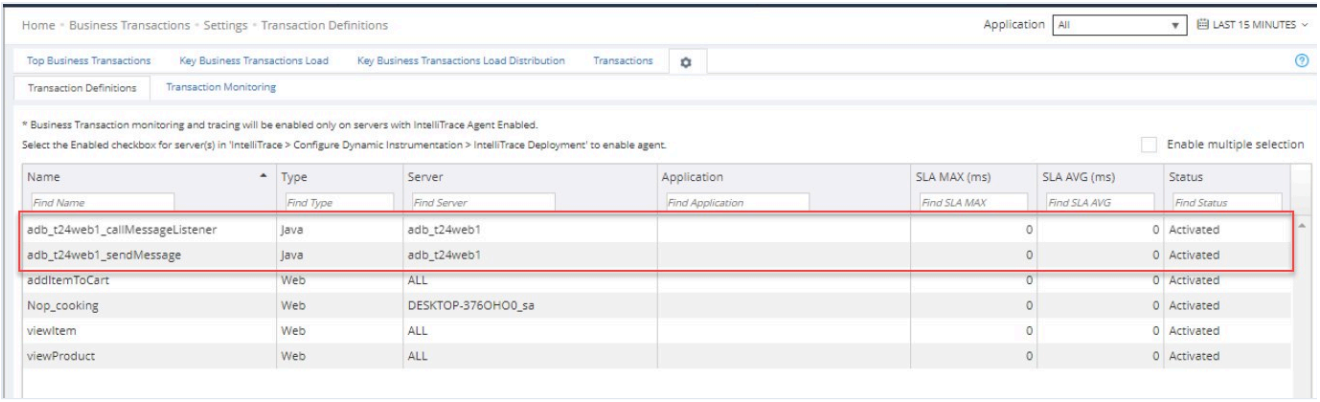

Step 3: On the same screen, click on the third tab **schedules**.

Step 4: Choose the server configured for the remote command from the **server dropdown**, then click the **save** button.

Step 5: After 2-3 minutes, navigate to **Business Transactions-> Settings-> Transaction** Definitions screen to verify that the KBT has been created.

KBT creation only occurs when a JMS transaction is executed.

If you prefer not to auto add KBT and only view KBT trace details in remote commands, remove the "**autoaddkbt**" keyword from the command.

```text
setapplicarearg arc.jms.thread true
```
